SUMMARY

AI and Machine Learning B.Tech student graduating in 2027 (CGPA: 9.13/10), with data analytics internship experience at IIT Hyderabad. Builds Python applications using Scikit-learn, PyTorch, NLP and retrieval-augmented generation, with projects in cybersecurity and healthcare.

EDUCATION

IILM University, Greater Noida | B.Tech, Artificial Intelligence and Machine Learning

2023 - 2027 (Expected) | CGPA: **9.13/10**

Indian Institute of Technology Madras | BS, Data Science and Applications

2024 - 2028 (Expected) | **Ongoing - Correspondence degree**

TECHNICAL SKILLS

Languages & data: Python, SQL, C; Java (foundational); Pandas, NumPy, Matplotlib, SQLite

ML / AI: Scikit-learn, PyTorch, NLP, LSTM, GNN, RAG, feature engineering, model evaluation

Development: Flask, REST API integration, Ollama, Gemini API, Git, GitHub, Jupyter Notebook

SELECTED PROJECTS

DarkTraceX | AI Cybersecurity Threat Intelligence | Jan 2026 - Present

- Trained four Scikit-learn text classifiers for phishing, log threats, code security and attack types; implemented an MLP, LSTM and GNN ensemble in PyTorch using averaged confidence scores.
- Built a 10-stage website analysis pipeline producing a 0-100 score across six risk dimensions; supported cached-report analysis for offline operation.
- Integrated local Ollama inference, model routing and a retrieval-augmented fallback using a self-generated corpus of 133+ JSON knowledge files.

Automated Medical Recommendation System | Jun 2025 - Sep 2025

- Built a symptom-based prediction application with Python, Flask and Scikit-learn; implemented data cleaning, feature engineering, model training and deployment.

MausamSahayak | Weather & Flood Advisory Backend | Capstone 2026-27

- Developed the team project's telemetry ingestion, database, Flask API and dashboard; validated readings and handled stale data for downstream risk assessment.

EXPERIENCE

Artificial Intelligence Intern | Codec Technologies | Jul 2026 - Sep 2026

- Applied Python and ML fundamentals to assigned project tasks and training modules under a project head.

Virtual Data Science Explorer Intern | YuvaIntern | Jul 2026 - Aug 2026

- Practiced Python data collection, cleaning, visualization and basic statistics in mentor-led workshops.

Data Analytics Intern | IIT Hyderabad | Jun 2025 - Aug 2025

- Cleaned and merged research datasets with Pandas and NumPy; created Matplotlib visualizations and reusable Python scripts to automate repetitive data-handling steps.

ACHIEVEMENTS & LEADERSHIP

- **1st Place:** Startup Idea Presentation (IIC) | **100+ DSA problems** solved on LeetCode and CodeChef.
- Coordinated recruitment drives with SCOP, IILM; created technical-event content as GDSC Social Media and Creative Lead.

SELECTED CERTIFICATIONS

Generative AI for Developers - PW Skills (Jun 2026) | Machine Learning - Internshala & IITM Pravartak (Jul 2025)
