SUMMARY

B.Tech student graduating in 2027 (CGPA: 9.13/10), building Python backend applications with Flask, SQLite and REST APIs. Project work spans sensor-data ingestion, alert handling and an offline cybersecurity assistant. Data analytics internship experience at IIT Hyderabad.

EDUCATION

IILM University, Greater Noida | B.Tech, Artificial Intelligence and Machine Learning

2023 - 2027 (Expected) | CGPA: **9.13/10**

Indian Institute of Technology Madras | BS, Data Science and Applications

2024 - 2028 (Expected) | **Ongoing - Correspondence degree**

TECHNICAL SKILLS

Languages: Python, SQL, C; Java (foundational) | Data Structures and Algorithms

Backend: Flask, REST APIs, SQLite, JSON, API integration, data validation, Python scripting

Web & tools: HTML, CSS, Git, GitHub, Jupyter Notebook | Pandas, NumPy, Scikit-learn

SELECTED PROJECTS

MausamSahayak | Weather & Flood Advisory Backend | Capstone 2026-27

- Developed the Python/Flask backend for a team capstone: telemetry ingestion, SQLite storage, REST endpoints, a live dashboard and alert generation.
- Validated incoming readings, handled duplicate records and represented missing or stale sensor data as UNKNOWN; implemented alert de-escalation holds to reduce repeated status changes.

DarkTraceX | Offline Cybersecurity Assistant | Jan 2026 - Present

- Built a Python application with SQLite-backed conversations, searchable notes, browser session persistence and Markdown/JSON transcript exports.
- Integrated local Ollama inference with defensive analysis tools and offline knowledge retrieval; supported cached website reports when live data is unavailable.

Automated Medical Recommendation System | Jun 2025 - Sep 2025

- Developed a Flask web application that connects symptom inputs to a Scikit-learn prediction pipeline, from data preparation and feature engineering through model integration and deployment.

EXPERIENCE

Artificial Intelligence Intern | Codec Technologies | Jul 2026 - Sep 2026

- Applied Python and ML fundamentals to assigned project tasks and training modules under a project head.

Virtual Data Science Explorer Intern | YuvaIntern | Jul 2026 - Aug 2026

- Practiced Python data collection, cleaning, visualization and basic statistics in mentor-led workshops.

Data Analytics Intern | IIT Hyderabad | Jun 2025 - Aug 2025

- Cleaned and merged research datasets with Pandas and NumPy; created Matplotlib visualizations and reusable Python scripts to automate repetitive data-handling steps.

ACHIEVEMENTS & LEADERSHIP

- **1st Place:** Startup Idea Presentation (IIC) | **100+ DSA problems** solved on LeetCode and CodeChef.
- Coordinated recruitment drives with SCOP, IILM; created technical-event content as GDSC Social Media and Creative Lead.

SELECTED CERTIFICATIONS

Generative AI for Developers - PW Skills (Jun 2026) | Machine Learning - Internshala & IITM Pravartak (Jul 2025)
